The RSC Thermal Methods Group presents The Use of Thermal Methods in the Investigation of Biomaterials

A 1-day meeting at the Weston Building, Manchester Conference
Centre, The University of Manchester
24 November 2010

Invited speakers include:

Prof. C. Popescu (DWI, Aachen)
Prof. F.J. Wortmann (The University of Manchester)
Prof. K. Entwistle (The University of Manchester)

Further speakers to be announced

Presentation Subjects include:

Thermal analysis and authentication of historical, collagen-based materials,
Thermal transitions in α -helical, keratinous proteins, Dynamic Mechanical
Analysis of wood, all aspects of the thermal characterization of biomaterials &
biopolymers

This 1 day event brings together a number of leading thermal analysts, who will show applications of thermal methods to biopolymers and biomaterial development and analysis.

There will be a manufacturers' exhibition, so you will be able to see the latest advances in technology.

Posters for presentation of recent advances of research in all areas of thermal analysis are most welcome.

Certificates of attendance will be issued, which can be added to your CPD-portfolio

Registration

TMG member	£90
TMG non-member	£100
Student	£35
Exhibitor (incl 1 person)	£100
Additional exhibitors	£50
Poster presenters	£50

To register e-mail your details to:

Prof Franz J Wortmann
School of Materials
The University of Manchester
